The output of our MYR project is a website, which can be accessed via the following URL:

https://m-y-r.herokuapp.com

We have designed the website in a way so it is both informative to viewers and can be presented in a form similar to PowerPoint presentations. It takes around ten minutes (the recommended time) if the website is to be presented.

The source code of the website can be found in the following GitHub repository:

https://github.com/ml24330/meet-your-researcher

The website was built upon the back-end library *Express* and the front-end library *React*, both MIT licensed. The website is deployed to *Heroku*. All codes are authentic and all images used are cited when appropriate, with the website itself licensed under ISC.

Past versions and commits of the website can be accessed using the GitHub repository. Please refer to the latest commit date to ensure that no further modifications were made after the deadline (November 6th).

Technological questions about the website should be directed to m.liu48@lse.ac.uk.
